

GDI IVD™ Intake Valve Cleaner

*EASY to Use!
No intake manifold
disassembly
required.*

Groundbreaking technology reaches intake valves at **150X more concentration** than any premium fuel system additive on the market.

The **first** product **PROVEN** to clean damaging deposits from intake valves on all gasoline powered engines, without top-engine disassembly.

PROVEN to remove up to 46% of carbon buildup on intake valves in the first hour after use

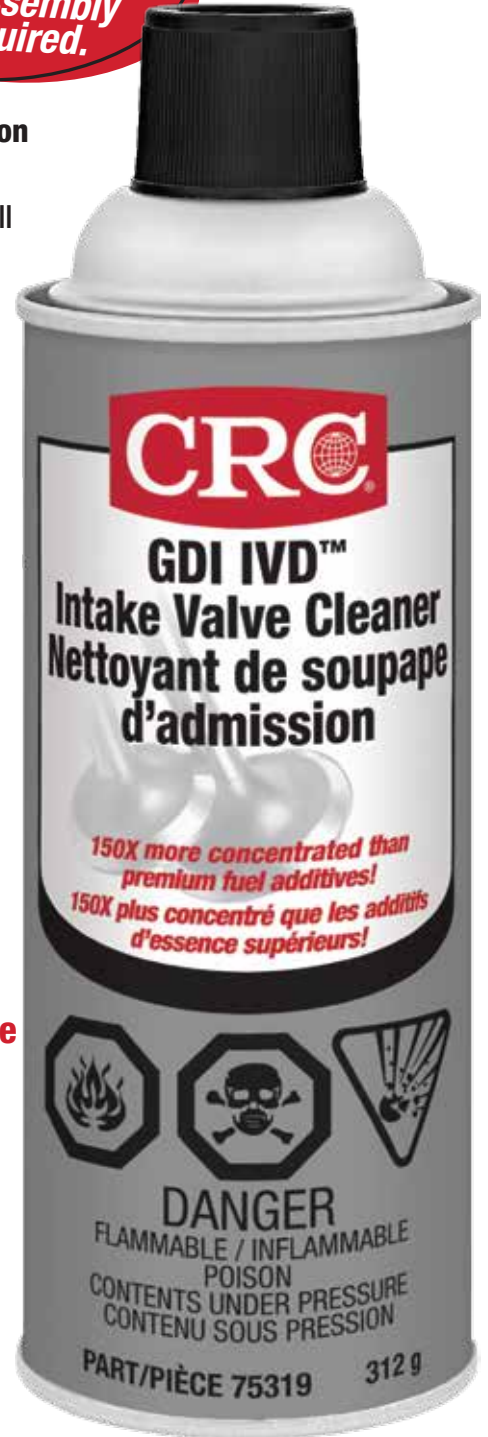

- ➔ Excellent **GDI (Gasoline Direct Injection)** valve deposit removal
- ➔ Dissolves and lifts deposits from **ALL TYPES** of gasoline powered engines
- ➔ Delivers concentrated COzol® chemistry directly to the valves

- Increases Power and Torque
- Stabilizes Rough Idle
- Solves Rough Starting Problems
- Use Every 16,093 KMs
- Improves Fuel Economy
- Safe on Turbos and Intercoolers
- Reduces Emissions

Easy to use - Spray past the MAF sensor through the air intake

Deposits form in every fuel system, but the amount and how quickly they form depends on the quality of fuel and oil you use, your driving style and engine type. GDI (gasoline direct injection) engine intake valves are prone to rapid deposit buildup because they never get cooled or washed with fuel. Deposits form in as few as 8,047 to 16,093 kms, restricting proper airflow and increasing operating temperatures. **SYMPTOMS** include hard starts, rough idle, poor acceleration, reduced fuel economy, excess emissions and power loss.

Part Number: 75319X6
312 g Aerosol
6 / case
