

BUG BLAST™

Wasp & Hornet Killer

BUG BLAST™

WASP & HORNET KILLER

Fast-acting, high strength insecticide that knocks down and kills wasps, hornets, ants, and spiders on contact.

Contains no chlorinated solvents and is safe to use on plastics. Dense, accurate spray reaches over 7 metres. High dielectric strength of over 40,000 volts.

- Kills wasps, hornets, bees, insects on contact
- Gives rapid contact kill and residual kill of insects returning to treated nest
- Reaches nests more than 7 metres above ground
- High dielectric strength of over 40,000 volts
- Dense, accurate spray reaches over 7 metres

72010

397 g aerosol

12 / case

The best time to spray the nest is in the early morning or early evening when air temperature is cooler, most insects are in the nest and little activity is observed around the nest opening. Spray only if the air is still. Stand at a safe distance from the nest, not directly under it. Hold container upright at arms length, point the actuator at the nest and spray into the opening of the nest first. Then spray the rest of the nest until it is saturated. Treated insects may fall out of the nest and die. Any insects returning to the nest after treatment will be killed. Wait 48 hours before removing the nest. Foliage of desirable plants that were contacted with spray should be hosed off.
