

FiberLock™

Head Gasket & Block Repair

THE ULTIMATE SOLUTION FOR ALL COOLANT LEAKS!

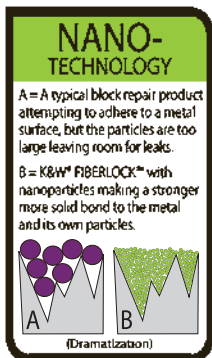

- ✓ **FIBERLOCK™** is an easy-to-use, *POUR & GO*, permanent head gasket & block repair.
- ✓ **FIBERLOCK™** permanently repairs cracks in head gaskets, engine blocks, intake gaskets, cylinder heads, heater cores, freeze plugs and radiators.
- ✓ **FIBERLOCK™** provides DIYers and installers with a simple and effective alternative to performing time-consuming, and costly repairs.
- ✓ **FIBERLOCK™** is compatible with all types of anti-freeze.
- ✓ **FIBERLOCK™** attacks cooling system leaks with three unique technologies: Military-strength fibres, Nanotechnology, and Cool-X™ conditioner.

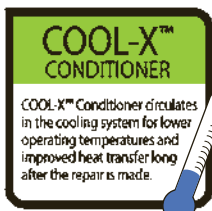

Military-Strength Fibres

FIBERLOCK™ contains sodium silicate reinforced with military-strength proprietary fibres with a high strength-to-weight ratio to make an interlocking web-like weave over the crack or breach, ensuring a PERMANENT, multi-layer, impenetrable repair.

Nanotechnology

FIBERLOCK™ features nanoparticles so small they reach into cracks and crevices other products can't. This makes the molecular bond of the repair stronger and more solid when permanently hardened to the surface area.

Cool-X™ Conditioner

Cool-X™ Conditioner circulates in the cooling system for lower operating temperatures and improved heat transfer long after the repair is made.
